IVF Embryo Transfer Catheter

ULTIMATE QUALITY WEGO INTELLIGENT MANUFACTURING

LEADING INDUSTRY STANDARD, FIVE MODELS FOR DIFFERENT PATIENT NEEDS

The first drafting unit of industry standard YY/T 1718-2020 Medical devices for human assisted reproductive technology in vitro - IVF Embryo Transfer Catheter

- Unique tapering process reduces tissue damage
- Five models for easy selection

It is made of medical-grade super-smooth material, the outer tube wall is smooth, the friction coefficient is small, the biocompatibility is good, and it can be developed under B-ultrasonic.

Catheter is tapered with smooth and blunt sections to minimize endometrial damage.

The inner tube is soft and elastic, and can be equipped with supporting steel bracket.

There are scale marks at 1cm intervals at the tail end for accurate positioning.

Different hardness ferrules are provided, which is easy to adapt to the operation under different transplantation environments.

Model	Inner Tube		Outer Tube		With Plug-In Core	Inner Pipe With Steel Bracket
	Inner Diameter	Length	Inner Diameter	Length		
I	0.71	230	1.85	170	×	×
II	0.71	230	1.85	170	○	×
III	0.50	240	1.57	170	×	○
IV	0.50	240	1.57	170	○	○
V	0.71	246	1.85	170	○	○
